**TTA**

- For timber thickness of up to 50mm into an aluminium under-construction of min 1.6mm and max 3mm
- Make sure that the connection does not exceed the recommended maximum tensile capacity of 0.8kN and a maximum shear capacity of 4kN per fixing point. If in doubt speak to a qualified engineer for advice.
- We strongly recommend the use of the spacer clip Art.No. 663670 for perfect results and extra safety.
