- For timber thickness of up to 50mm into a steel under-construction of min 1.25mm and max 3mm
- Make sure that the connection does not exceed the recommended maximum tensile capacity of 1kN and a maximum shear capacity of 4kN per fixing point. If in doubt speak to a qualified engineer for advice.
- We strongly recommend the use of the spacer clip Art.No. 663670 for perfect results and extra safety.
