Looks good. Feels good. Does good.

Using natural materials in design and décor is proven to have a positive effect on wellbeing. Known as biophilic design, it reconnects people with nature, can help reduce stress and improve our emotional state. TouchWood veneer panelling is a way to bring native wood within everyone's reach, in more ways than one.

TASMANIAN OAK ON NATURAL LINING

Tasmanian Timber is sustainably grown, harvested and processed to meet the highest standards in quality and environmental practice.

TouchWood is a versatile tongue and groove panelling product.

Sustainable is now affordable.

TouchWood has been created to make the warmth and beauty of natural timbers accessible to a wider range of interior designs and budgets.

The 9mm moisture resistant MDF board backing (in natural or black) with Blackwood or Tasmanian Oak veneer face gives the illusion of solid timber VJ panelling. And the good stuff doesn't end there. It is also a sustainable product that utilises native timber veneers from PEFC certified forests.

Saving money and time on both materials and installation, TouchWood can be used to transform an existing space by fixing it directly onto plasterboard or specified in new projects at scale.

BLACKWOOD ON BLACK LINING

Perfect for off-the-wall design.

Designers don't limit their imagination to only using TouchWood as a wall panelling. By combining their creativity and TouchWood's easy installation and effortlessly versatile ergonomics, they use it to clad ceilings, bedheads, cupboards and counterfronts. It is equally at home fixed vertically or horizontally; in modern interiors or more traditional settings and can be left uncoated or finished with wax, oil or polyurethane in matt, gloss or satin finish.

Tasmanian Timber

TouchWood is made from PEFC certified Tasmanian Timber veneer pressed on moisture resistant MDF board with a vertical groove to give the appearance of solid VJ panelling. It is quick and easy to install, more cost effective than solid timber and just as beautiful. Available in Tasmanian Oak and Blackwood, it can be left natural or finished with a stain, wax or varnish.
