

A Global Brand. A German Product. A Local Company.

A Global Brand

Founded in 1823, Altenloh, Brinck & Co was the first company to undertake the industrial production of screws in Germany. In 1967 the company revolutionised the industry worldwide with the invention of the SPAX universal screw.

A German Product

At SPAX, we do not compromise on quality. Every SPAX product is designed and manufactured for a specific application. We guarantee that when used correctly, SPAX products will perform way beyond any inferior or cheaper product on the market.

A Local Company

In the Australian/New Zealand market, more and more builders, developers, architects, councils and landscape architects have discovered the advantages of dealing with a local company that's fully backed by a global corporation.

Why Choose SPAX?

SPAX screws are designed to save you time, reduce your project costs and to outlast the lifetime of your project.

Inferior screws can lead to splitting, increased project costs and a poor finish.

SPAX screws give a superior finish, durability that can outlast your project and low maintenance.

For more info on how SPAX screws can make your next project easier, faster and more cost effective call Britton Timbers.
