

SPAX Facade with very small countersunk head

- T-STAR plus with recess T15 prevents the bit from slipping and ensures an ideal distribution of force.

- Easy, strong screw fastening due to SPAX typical ground serrations.

- The very small raised countersunk head can be nicely countersunk and ensures a perfect tongue and groove connection.

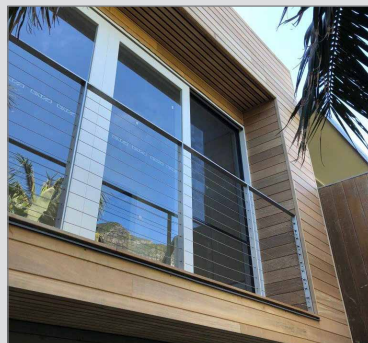

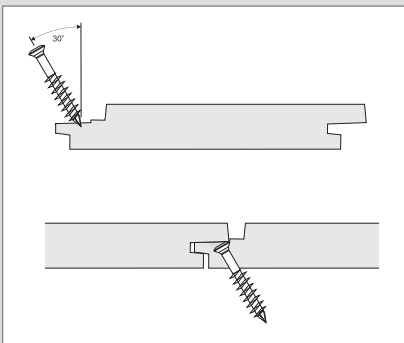

- The CUT point effectively reduces splitting of the wood.
- No pre-drilling needed in softwoods.

Applications

- Facade cladding (secret fix up to 20mm thickness)

SPAX Facade cladding 4 x 45 (with small head)		Screw Product Code	SPAX T-STAR plus Drive Bit (50mm Long)	Drive Bit Product Code
