

# Abodo

Radiata Pine

Abodo is a premium created thermally modified New Zealand plantation timber with FSC certification for superior beauty, durability and weathering characteristics.

## Application Suitability

Joinery • Decking & Cladding

Density	450
Specific Gravity	0.45
Modulus of Rupture (Mpa Dry)	79
Modulus of Elasticity (Gpa Dry)	8
Radial Shrinkage	2.0%
Tangential Shrinkage	3.0%

Hardness (janka) (kN)	3.1
Finish	Excellent
Gluing	Good
Machining	Excellent
Sapwood Lyctid susceptible	No

Stability	Good
Durability	Durable
Screwing Split Resistance	Good
Nailing Split Resistance	Fair
Growing region	Asia Pacific
Availability	Widely
