

# Vitex (Pacific Teak)

Vitex Cofassus

Vitex is a durable hardwood with a pale yellowish to creamy-grey appearance. Texture is fine and slightly lustrous with an even grain.

## Application Suitability

Decking & Cladding

Density	700	Hardness (janka) (kN)	5.6	Stability	Fair
Specific Gravity	0.7	Finish	Excellent	Durability	Durable
Modulus of Rupture (Mpa Dry)	113	Gluing	Poor	Screwing Split Resistance	Fair
Modulus of Elasticity (Gpa Dry)	12	Machining	Good	Nailing Split Resistance	Fair
Radial Shrinkage	2%	Sapwood Lyctid susceptible	No	Growing region	Asia Pacific
Tangential Shrinkage	4%			Availability	Available
