

AUSTRALIAN WORMY CHESTNUT FLOORING

Eucalyptus Obliqua, E.Sieberi and E.Fastigata

Australian Wormy Chestnut is as individual as you are.

The harshness of life deep in Australia's south-eastern forests is etched in to the grainy heart of every Australian Wormy Chestnut floorboard.

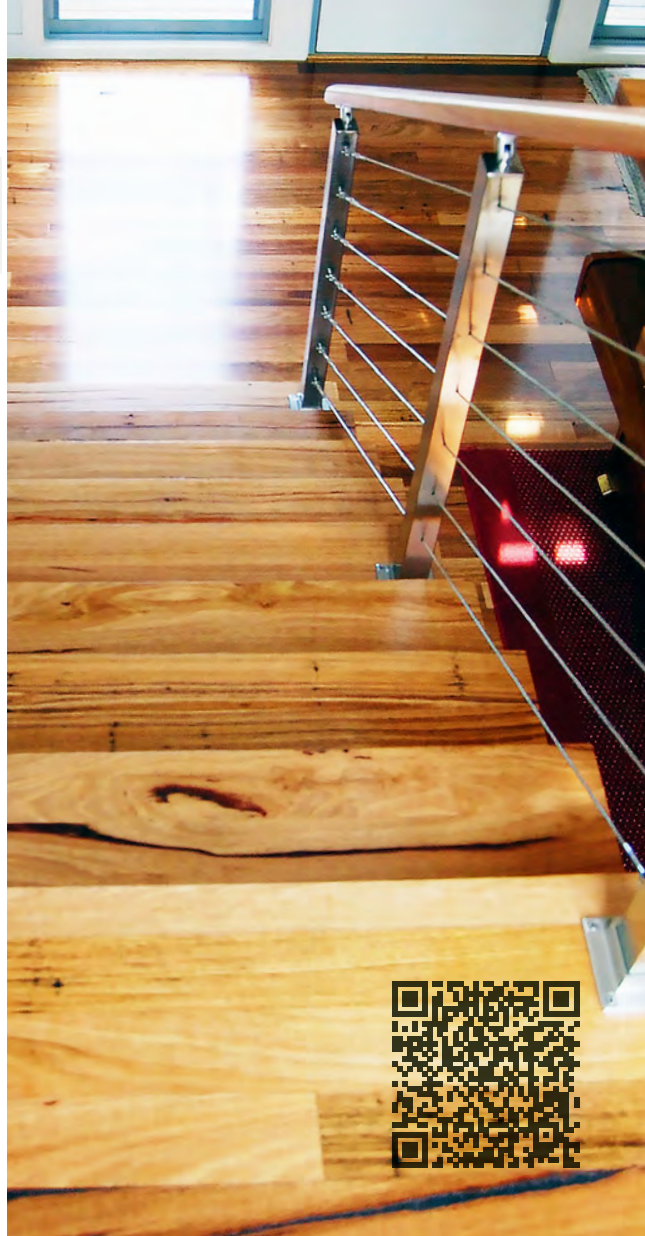

Attacks from blistering bushfires, the parched years of drought, the ravages of insects and the sand-blasting of relentless winds shapes a bespoke wood perfect for today's modern design requirements.

Wormy Chestnut is aptly named: squiggly worm trails, ambrosia beetle holes and deep red veins reflect its struggle for survival in the savage beauty of the Australian landscape.

This is a low maintenance wood that makes a statement and is finding favour with designers and architects nationally and internationally.

- Sizes:**
- 19 x 85 Tongue and Grooved Secret Nailed End Matched
 - 19 x 130 Tongue and Grooved End Matched
 - 19 x 185 Tongue and Grooved End Matched
 - 14 x 85 Tongue and Grooved Overlay
 - 14 x 130 Tongue and Grooved Overlay

Britton Timbers can supply matching stair componentry and stair treads.

TECHNICAL INFORMATION

Density (kg/m3 dry)	800	Tangential Shrinkage %	6	Machining	Good
Specific Gravity	0.8	Hardness (Janka) (kN)	8	Resistance to Split in Nailing	Good
Modulus of Rupture (MPa dry)	118	Finish	Good	Resistance to Split in Screwing	Good
Modulus of Elasticity (GPa dry)	15	Stability	Good	Gluing	Good
Radial Shrinkage %	3.5	Sapwood Lyctid Susceptible	No	Growing Region	VIC
				Availability	Available
