

The background of the top half of the image shows a swimming pool with a light-colored deck. A fence made of vertical, wavy wood panels (Tricoya) runs along the back of the pool. The sky is overcast, and there are trees in the background.

tricoya 

Freedom to design. Built to last.

Tricoya is a high-performance exterior panel made from Accoya[®] wood components, the same acetylated material known for its unmatched durability and stability.

Using Accoya as its foundation, Tricoya combines proven acetylation performance with the machining and design freedom of MDF, creating a wood panel built for design, and made for weather.

WHY CHOOSE TRICOYA?

DESIGN FREEDOM

- Machines, routs, sands, glues, and paints like MDF.
- Enables complex shapes, smooth finishes, and precision detailing.
- Perfect for creative exterior and wet-interior applications: façades, signage, cabinetry, trim, and furniture.

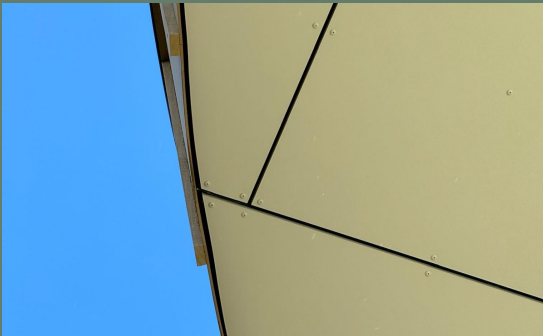

BUILT FOR THE ELEMENTS

- Exceptional resistance to swelling, warping, rot, decay and termites
- Performs consistently in humidity, rain, heat, or freeze-thaw conditions.
- Retains paint and coatings longer, reducing maintenance cycles.
- Class I durability – no equal.

PROVEN DURABILITY

- Independent testing across Florida, Australia, Borneo, and Okinawa confirms superior decay and termite resistance.
- Outperformed teak, oak, and cedar in long-term field exposure.
- Backed by a 50-year above-ground and 25-year in ground or freshwater warranty.

LOW MAINTENANCE, HIGH VALUE

- Coatings last longer thanks to exceptional dimensional stability.
- Resistant to fungal decay and termites.
- Reduces repaint cycles, callbacks, and lifecycle costs.
